

3/28/92  
— an added advantage of injectable  $E_c^+$  is  
that there is literally no limit to depth  
of treatment such as seen with PDT, —  
which the light can penetrate only to 5 mm,  
or where diffusion techniques have to be employed

8:30 PM 3/28/92 — in flight  
— one would use endoscopes to place the treating  
 $E_c^+$  virtually anywhere in the body utilizing the  
injection technique
